

# Siry Saves the Semester

## Google Gemini

### Aligned to WIDA 2020:

- Enhances Interpretive Skills via creation of visuals and infographics.
- Allows educators to adapt content and label concepts for scaffolding.
- **Online Classroom Tip:** Ideal for small-scale infographics, vocabulary visuals, and culturally relevant image creation or adaptation.

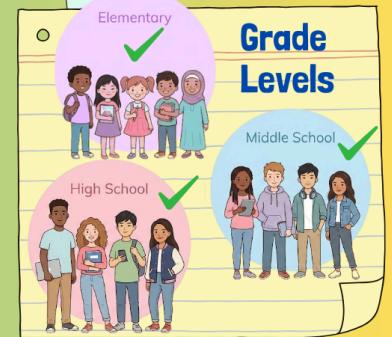

### Limitations: (FREE ACCOUNT)

- Image generation capped and lower resolution.
- Basic model only; no advanced tools like video, deep research, and bulk image creation.
- Generated images often contain spelling errors; it is recommended to use a text-correction tool and carefully review all outputs.

### Pro Tip:

To maximize your free usage, have another free AI help generate and refine your image prompts before using them in Google Gemini.

**Disclaimer:** App features, pricing, sales, and payment plans change regularly. The information in these tutorials was collected in Winter 2025 and may no longer reflect current offerings. Please verify details with the respective apps, as they are subject to change at any time.

## ChatGPT

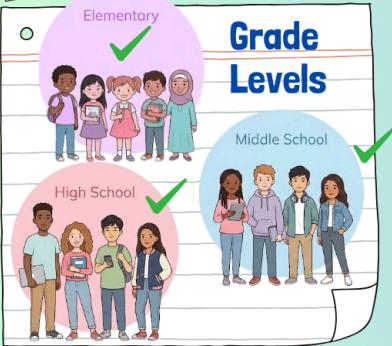

### Pro Tip:

Use ChatGPT to polish instructions, generate examples, or scaffold content for MLLs. Always maintain ethical standards when using AI so avoid inputting names and other sensitive information!

# Siry Saves the Semester

## Grade Levels

### Aligned to WIDA 2020:

- Educators can help support multilingual learners (MLLs) by providing leveled and scaffolded content in their second language (L2) while also offering translations, bilingual prompts, and culturally relevant explanations to reinforce their first language (L1).
- **Ethical use NOTE:** Teachers review content for accuracy, cultural relevance, and appropriateness; ChatGPT is a support tool, not a replacement for instruction.

## Chat GPT

### Limitations: (FREE VERSION)

- Slower performance or “at-capacity” errors during use.
- Some tools (file analysis, multimodal tasks, advanced data handling) require paid plan.
- Work will not be saved for later unless the user is logged into an account.
- It will not accept multiple files and may add a time delay before responding in those chats.

**Disclaimer:** App features, pricing, sales, and payment plans change regularly. The information in these tutorials was collected in Winter 2025 and may no longer reflect current offerings. Please verify details with the respective apps, as they are subject to change at any time.
